**IV) The highlighted words are mixed up in this text about Hungarian schools. Find their correct places and write the correct words next to the numbers.**

Children in Hungary start school at the age of six and **1) and** usually finish it at the age of eighteen. Before starting primary school, children go to kindergarten. All pupils start their studies at primary school and after the fourth year they can **2) university** whether to stay or continue learning in an eight-form grammar school. After the sixth year they can attend a six-form grammar school if they want. Many talented **3) decide** smart children take this opportunity.

When pupils finish **they** school, they can study in vocational schools, where they learn a trade. Or the students can go to secondary comprehensive schools where they learn general subjects and they also get practical training. Or students can study in grammar schools which prepare students for continuing their studies at college or **Maths**. At the end of 12<sup>th</sup> form students are required to take a school-leaving exam in five subjects. The compulsory subjects are Hungarian language and literature, **primary**, History and a foreign language of choice. Pupils are allowed to pick one more subject based on their interest.

- 1) \_\_\_\_\_ 2) \_\_\_\_\_ 3) \_\_\_\_\_ 4) \_\_\_\_\_ 5) \_\_\_\_\_ 6) \_\_\_\_\_

**V) An internet forum**

**Iliana**

My parents always tell me my lifestyle is unhealthy. Mum says I eat too much fast food, but how much is too much? I go out with my friends twice a week, and we have pizzas, burgers and a coke. Where's the problem?

That's what young people normally do! I have lots of fruit at home, I eat normal home cooking – I'm not a fussy eater like a vegan or anything! My dad says I should get more exercise, but he sits on the sofa all day watching the TV!

**Magda**

You shouldn't worry about what your parents think! My parents are never happy with what I do, but you learn not to listen! Have you got any brothers or sisters with a food problem? I have a sister who doesn't like vegetables, fish or cheese. She only likes sausages, pasta and fruit! I think she should see a doctor! But my parents don't worry very much – they say it's just part of growing up!

**Petra**

You two are lucky! Your parents know how to cook! They should send my parents to a cookery school! We get cabbage four times a week, and take-away meals the other days. When I want some fruit, I have to buy it myself. My father's like Homer Simpson – he eats everything and anything, and then he wants some more! It's painful to watch him and I get a headache from listening to him! Maybe I should go and live with my grandparents – they always have good food!

**Write the correct names (Iliana, Magda or Petra) in the blanks.**

- 1 \_\_\_\_\_ sometimes has fast food.
- 2 \_\_\_\_\_ doesn't listen to her parents.
- 3 \_\_\_\_\_ prefers her grandparents' cooking.
- 4 \_\_\_\_\_'s father doesn't do any exercise.
- 5 \_\_\_\_\_'s parents don't give her any fruit.
